LDWSF
12.3.54 vs
03/26/69

FROM: John Hodgson

SUBJECT: Inspection of Industry
Along Duwamish

Dennis Hitt of the Dept. of Fisheries and I observed three cement companies discharging waste material directly into the Duwamish River.

We noted the Truck Washing facilities of both Permanente Cement Company and Seattle Ready Mix to be inadequate as they did not provide any means of treatment before being discharged to the river.

We also noted Lone Star Cement Co. has an outfall line under their dock. The effluent from this line is thick with cement waste and there is a heavy buildup of this material on both sides of the point of discharge.

I took two pictures of the situation at Lone Star and two pictures of the truck washing facility at Permanente which are to be on file with this memo.
